

Sanitation Services

Whether you operate a bank, grocery store, or pharmacy, you want your customers to know they are stepping into a safe, sanitary environment. **We understand that.**

Our mission during this time is to apply our quality services towards *restoring consumer confidence* in the places we serve.

How? Our porter, sweeping, and pressure washing services play a key role in creating and maintaining sanitized environments for businesses providing essential services and the communities they serve.

- 1.** Providing on-site sanitation services for commercial properties, *porter* services remove trash, empty common area garbage bins, and much more! Porter services make facilities more comfortable, cleaner, and safer for employees, clients, and guests.
- 2.** Collecting more than 150 yards of waste material every night, our *sweeping* division uses the industry's best equipment to promote the health, cleanliness, and safety of shared outdoor areas.
- 3.** Blown Away's commercial *pressure washing* disinfects exterior surfaces using industry safety practices, hot water (190°F or more), and EPA-registered disinfectants approved by the CDC as a coronavirus-fighting product.
